Hospital Member

Excellence In Small Animal Care

If you were going to refer your friends and family's pets, wouldn't you want them to go to a veterinary hospital that offers the highest standards in quality care and medicine? For this reason we chose to become a Certified Hospital Member of the American Animal Hospital Association (AAHA).

American Animal Hospital Association: It is the highest standard a veterinary hospital can attain. All AAHA accredited hospitals voluntarily meet or exceed the Association's standards for facilities, equipment, and quality of practice. Only 14% of all small animal practices in the United States and Canada are members. The doctors at Frankford Crest Animal Hospital have been affiliated with Certified AAHA hospitals for over 25 years.

Why did we become an AAHA member? It is our life's work to honor the special bond you have with your pet by providing the highest quality care possible to prevent disease or catch it as early as possible. We aim to prolong your pets' life *and* provide the best quality of life possible. We can better attain these goals by choosing voluntary membership in AAHA.

What do we do that's different from many other hospitals? Our hospital agrees to voluntary compliance and periodic inspections in the following areas:

- 1) **Complete Diagnostic Facilities:** An on site diagnostic lab for blood test, urinalysis, and access to veterinary pathology labs. Quality control standards and accurate record keeping are provided.
- 2) **Modern & Complete Surgical Facilities:** We provide a state-of-the art surgery suite and use the best anesthetics available in Veterinary Medicine coupled with updated monitors, patient warmers, intravenous infusion machines and fluid & blood warmers.
- 3) **Dental Services:** We use state-of-the art scalers, polishers, and high speed dental machines to allow dentals to be as painless and effective as possible. Fluoride treatments and polishing are routine.
- 4) **Complete Diagnostic Imaging (X-Ray):** We have on site X-Ray machine, imprinter, & automatic processor. We submit periodic radiographs to AAHA to maintain proper quality control. We can provide diagnostic ultrasound by appointment.
- 5) **Proper Nursing Care:** Oxygen for intensive care, heated enclosures, humidifiers and monitoring equipment are provided as needed
- 6) **Complete Pharmacy Facilities**
- 7) **Proper Medical Record Keeping**
- 8) **Complete Exam Facilities**
- 9) **Emergency Care**
- 10) **Ongoing Continuing Education**
- 11) **Proper Housekeeping & Maintenance**

We do all of this for your pet because we feel every pet should have the highest quality care possible.

We appreciate the referrals of your friends & family to Frankford Crest Animal Hospital.
